

AUTUMN WINTER 2024/2025

SILVINI[®]

TECHNICAL
SPORTSWEAR

We design and manufacture professional cycling and ski apparel for maximum performance and comfort. We focus on various styles of cycling, from road & gravel, MTB & enduro to urban and offer wide selection for skiers: cross-country, ski touring, outdoor and lifestyle.

We put great emphasis on technology.
We believe in research and development
of materials and innovations that enable
cyclists and skiers to rise to the top.
We make all our clothing from carefully
selected materials, taking into account
the specific form of both sports.

The birth of SILVINI was led by Jessie
and Dušan, who invited their friends Jan
and Claudio to join them. Although we
come from different parts of the world,
we are united by our passion for sport
and our desire to produce sportswear
that combines perfect functionality,
original design and uncompromising
comfort. And so, in 2009, SILVINI was born
— a Czech brand based in the heart of
Europe with an international reach.

A handwritten signature in white ink, appearing to read 'Dušan Neuwirth', is located below the text on the left side of the page.

CREW & CONTACTS

For cross-country skiing the right clothing is crucial. This sport requires functional, well breathable, lightweight, and wind-resistant clothing. For our XC SKIING products, we prefer proven materials, especially Softshell light and Quatroflex Shell, which we use across the entire range. These materials provide excellent protection against adverse weather conditions, and thanks to their anatomic cut, they allow freedom of movement, contributing to your comfort and performance on skis. Our products have been tested by the best, such as the ED system SILVINI team.

SPOTTED BY MOUNTAINS

WINTER SILENCE AND PEACE. JUST YOU AND THE MOUNTAINS...

...and the weather, which can change in an instant. Snow, frost or sunny weather. Whether it's extreme cold or unexpected snowfall, our Ski Touring products will ensure you comfort and protection, with an emphasis on breathability, resistance to harsh weather and freedom of movement. Weight and compactness are key factors to meet all demanding challenges. We solved these complex tasks in cooperation with top textile manufacturers who have extensive experience in the field of material development with focus on extreme conditions and ecology. We introduce you the SASSOLUNGO jacket and the FISCALINO vest, which use a combination of Pertex® Quantum NetPlus® and PrimaLoft® Active Evolve recycled materials.

SKI TOURING

:PERTEX:  :

**NETPLUS®
MATERIAL IS MADE
FROM 100%
POST CONSUMER
RECYCLED
FISHING NET.**

PERTEX. WEAVING HIGH-PERFORMANCE
FABRICS FOR OUTDOOR PEOPLE SINCE 1979.

100%

Recycled fishing nets

68%

Energy reduction

67%

Fossil fuel reduction

20%

GHG emission reduction

70%

Water reduction

100%

Traceable supply chain

The Pertex NetPlus collection is supporting cleaner communities and ocean by diverting an existing waste stream. By replacing new plastics with post consumer recycled NetPlus, we are able to prevent a harmful waste and reduce the need to extract fossil fuels.

Through this collection we are working to set an industry standard for the way recycled materials are used, continuing to push forward with a positive impact approach to sourcing the materials required to make our products.

PROTECTS ENVIRONMENT

Prevents the most harmful form of plastic pollution, fishing nets, from entering the ocean environment.

EMPOWERS COMMUNITY

Allocates funds to partnering nonprofits to improve quality of life for communities, supporting an ethical supply chain that benefits all shareholders.

3RD PARTY VERIFIED

A robust, proven supply chain that is third-party audited and GRS certified for material traceability.

THE COLORS AND SCENTS OF AUTUMN
FROM THE SADDLE OF A BIKE

ENJOY YOUR CYCLING ADVENTURE TO THE FULLEST

The autumn cycling collection is based on reliable products that should not be missing in your equipment. Thanks to them, you don't have to worry about unpredictable weather and you can go for a ride with the confidence that you will stay dry and warm throughout the day. Be the master of the situation and take advantage of all the possibilities that our autumn collection offers you.

MATERIALS

Very strong material excellent in its resistance to abrasion. It is a two-layer material that substitutes real leather. Brushed synthetic leather is breathable and treated by sanding technology. Surface is brushed which ensures soft and pleasant look.

Light, quick-drying material, which thanks to its porous texture, wicks away sweat perfectly. It is a mesh material that is pleasant to the touch and also does not absorb water.

It is a synthetic filling material made of hollow fiber, which is very easy to maintain and has good heat-insulating properties. The material is very soft and light.

Very strong and durable woven material. It is waterproof and keeps its shape, has good thermal insulation properties. This fabric is known for its durability even when exposed to wear and tear.

Pertex® is a certified, extremely light material with many advantages. Pertex® Quantum fabric is recycled material, which is precisely made from incredibly fine yarns and is designed to trap still air and improve insulation performance. A durable water repellent (DWR) finish repels light rain and snow and provides additional weather protection.

Insulated material with combed inner side, effective for sweat drainage and thermal insulation. It has high thermal calorific value and adaptability in movement.

Durable three-layer material with membrane with parameters: Water column: 20,000 mm, Breathability: 20,000 g/m²/24h. It is suitable for extreme windy and rainy conditions even during active movement thanks to its excellent breathability. At the same time, the membrane protects the user against the penetration of wind into the lower layers of clothing and thus prevents from unwanted heat leakage.

Evolve Insulation Active

It is a synthetic warm lining with the properties of Primaloft®. Its advantages are extreme thermal insulation properties and excellent breathability. Compared to other synthetic fibers, it is characterized by great lightness, softness and compressibility.

Gold Insulation Active

It is a synthetic filling material that is very easy to maintain. Its advantage is extreme heat-insulating properties. Compared to other synthetic fibers, Primaloft® repels water and is characterized by great lightness, softness, compressibility and the ability to return to its original shape. Primaloft® Gold ensures the highest possible insulation and thermoregulation.

Silver Insulation Active

It is a synthetic filling material that is very easy to maintain. Its advantage are very good heat-insulating properties. Compared to other synthetic fibers, Primaloft® repels water and is characterized by great lightness, softness, compressibility and the ability to return to its original shape.

QUATROFLEX PLUS
FABRIC

Elastic three-layer material with membrane and parameters: Water column: 10,000 mm, Breathability: 20,000 g/m²/24h. It is suitable for windy and rainy conditions even during active movement thanks to its excellent elasticity. At the same time, the membrane protects the user against the penetration of wind into the lower layers of clothing and thus prevents from unwanted heat leakage.

QUATROFLEX POWER
FABRIC

Elastic three-layer material with a membrane with parameters: Water column: 10,000 mm, Breathability: 10,000 g/m²/24h. It is suitable for rainy conditions, at the same time it protects the user against the penetration of wind into the lower layers of clothing and thus prevents from unwanted heat leakage.

QUATROFLEX POWER
PRO FABRIC

Elastic three-layer material with a membrane with parameters: Water column: 10,000 mm, Breathability: 15,000 g/m²/24h. It is suitable for wind and rain even during more active movement thanks to good breathability. At the same time, the membrane protects the user against the penetration of wind into the lower layers of clothing and thus prevents from unwanted heat leakage.

QuatroFLEX 

Four-way densely woven, elastic material, partly water-resistant, which adapts to the figure and allows freedom of movement. It excels in its good breathability and retainability to its shape. It is wind resistant, which prevents from unwanted heat leakages.

QuatroFLEX 
Shell

Four-way densely woven, elastic material, partly water-resistant, which adapts to the figure and allows freedom of movement. It excels in its good breathability and retainability to its shape. It is wind resistant, which prevents from unwanted heat leakages.

QuatroFLEX 
Therm

Light, four-way elastic material that adapts to the figure and allows freedom of movement. It excels in its excellent breathability and retainability to its shape, it has good thermal insulation properties. The material does not have a combed inner side and is soft to the touch.

 **softshell light**

Elastic three-layer windproof material made of light fabric which adapts to the figure. It is slightly water-repellent and thus protects the user against the penetration of wind into the lower layers of clothing and thus prevents from unwanted heat leakage.

 **WOVEN light**

Lightweight, quick-drying, woven material with high breathability that flows down the body. The material is very strong, but at the same time thin and has a long lifespan.

 **WOVEN stretch**

Woven, quick-drying material with high breathability that allows freedom of movement. The material is very strong, but at the same time flexible and has a long lifespan.

 **WOVEN ultra light**

Woven, quick-drying material with high breathability that prevents from wind penetration into the lower layers of clothing and thus prevents from unwanted heat leakage. The material is very strong, but at the same time light and has a long lifespan.

YKK

A world-famous Japanese brand of zippers of the highest quality and perfect workmanship. The zippers do not get stuck and have a long lifespan.

ED system Silvini Team

GO ABOVE AND BEYOND

MANY YEARS OF PARTNERSHIP AND FRIENDSHIP

This is exactly what cooperation with the ED system Silvini Team is all about. We are proud to be supporting and contributing to the development of professional sportswear for this team with a broad base of athletes, including professional racers, hobby riders, and cross-country skiing enthusiasts.
